-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is insufficient supporting structure recited to which the first and second axes are connected, which results in an incomplete claim.

In claim 3, the phrases "open pipe frames" and "closed pipe frames" should be better defined using structural terms.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mark.

Figures 1,2 show structure as claimed, including a pair of lateral pipe frames to which are hinged a pair of "plates" 11,12 at different levels. Note that in the figure 2 position, one panel may be construed as a worktop and the other a front panel, though the limitation is functional and given little patentable weight.

Regarding claims 7 and 9, note the angle fixing means 27,28 which is fixed to the hinge joint.

Claims 1,2,4,7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Persson.

Figures 1,3 and 4 show a convertible seat structure as claimed, including plates 16,19 which are hinged between lateral frames.

In regards to claims 7 and 8, note that bracing understructure 26,27 (fig. 4) construes an angle fixing mechanism in one of the plates.

Claims 5 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Grose, Lockwood, Rasco et al, Solloway et al, Bridges and Breto show various features of the invention.
